-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Young et al in view of Stone

Young et al disclose a bakery shortening substitute. The shortening substitute may be an oil-in-water emulsion or water-in-oil emulsion. The emulsion comprises water, konjac gel and lipid. The shortening can replace shortening and other conventional fats in bakery food formulations on a one-to-one volume basis. The shortening substitute is used in cookies. (see col. 3 lines 7-13, col. 9 lines 19-39, col. 11 lines 1-31)

Young et al do not disclose the amount of solid delivered by the fiber gel.

Stone teaches konjac is a soluble dietary fiber. (col. 2 line 28)

While Young et al do not use the term dietary fiber gel, the konjac gel is a dietary fiber gel because konjac is a soluble dietary fiber as shown by Stone. As to the

amount, Young et al teach the shortening substitute can replace the fat in conventional formulations on a one-to-one basis; thus, the amount of solid in the fiber gel can vary depending on the cookie formulation and the amount of fat present in such formulation. It would have been obvious to one skilled in the art to use any known cookie formulation depending on the taste, flavor and texture desired.

Abboud et al, Loh et al and El-Nokaly all disclose fat replacement systems.
